如何在机器人上快速的搭建 可用的vio系统?

群id: 我和老板拼了

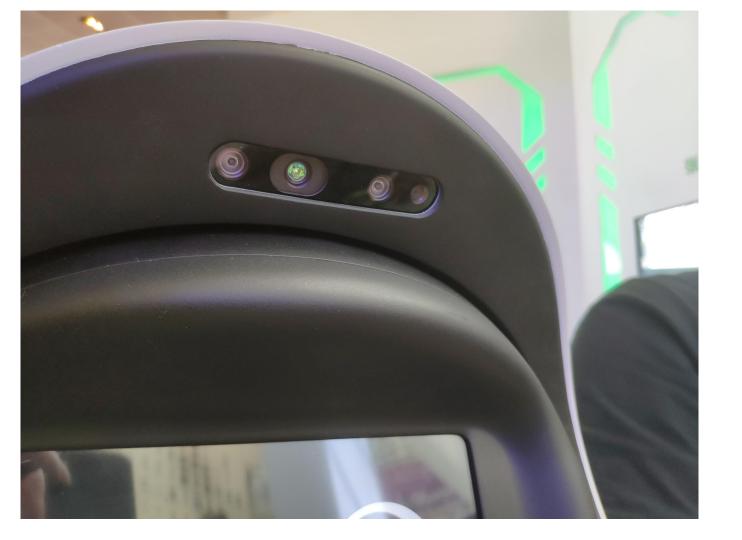

室内定位技术

- 1.UWB
- 2.激光
- 3.IMU
- 4.camera
- 5.编码器
- 6.超声波
- 7. ...

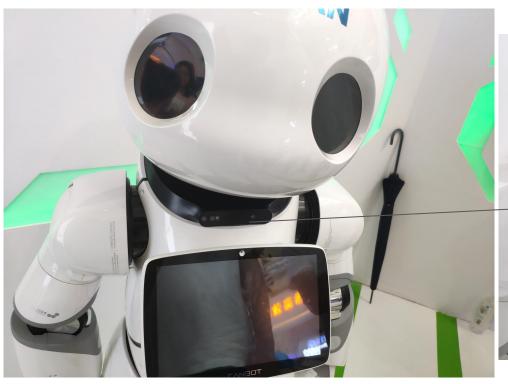

人工智能大会上的一些室内机器人

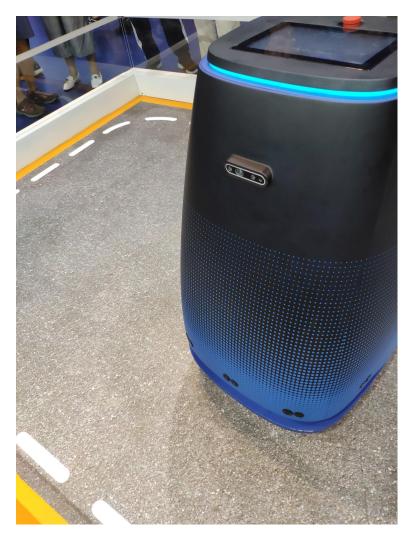

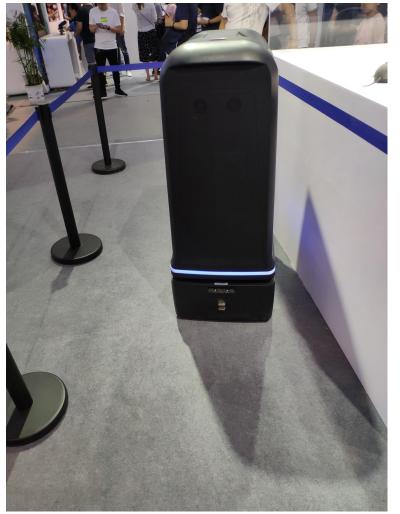

1.眼神好的人, 已经发现了...

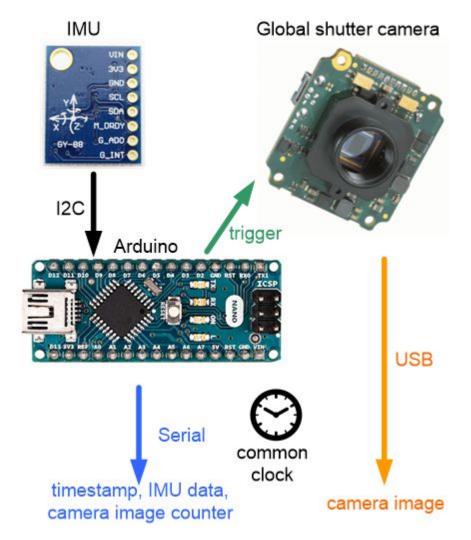

2.看到这,VIO研究者有什么想法?

老板:

我不听, 我要自己搭...

我:

- monochrome global shutter camera
 (mvBlueFox-MLC200wG,
 ON Semiconductor
 MT9V034 digital image sensor) connected via USB (important: it has an external trigger pin we'll use for hardware synchronization)
- 132 degree fisheye lense
- IMU: GY-88 (MPU6050) connected to Arduino Nano

time: 0 ms, IMU data, camera image #0

time: 5 ms, IMU data time: 10 ms, IMU data

...

time: 50 ms, IMU data, camera image #1

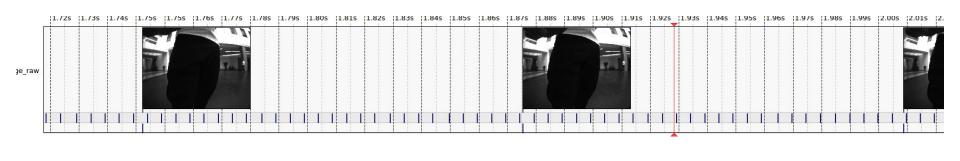

time: 55 ms, IMU data time: 60 ms, IMU data

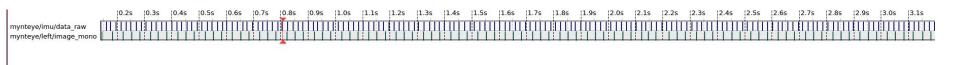

..

time: 100 ms, IMU data, camera image #2

. . .

		7.20s		7.25s		7.29s		7.34s		7.39s		7	.44s		7.49s		7.54s	
cam0/image_raw cam1/image_raw																		
cam1/image_raw	ļ., ,			1		1	1			<u> </u>								
imu0	$\perp \perp \perp$						$\perp \perp \perp \perp$			ш		\perp						
		100	200	10.00	1.00		1222		15.00		15.25	F)	1020	1.2		10.00		4.44s
	1.2	4.0	0s	4.04s	4.0	19s	4.14s		4.19s		4.24s		4.29s	4.34	ls	4.39s	-	4.44s
cam0/image_raw		1					1					- 1						
																- 1		
cam0/image_raw cam1/image_raw																		

影响非常大

我:14年以后还有人用滤波?

老板: rk3399警告

我:MSCKF 真香

感谢国内开发者的无私奉献

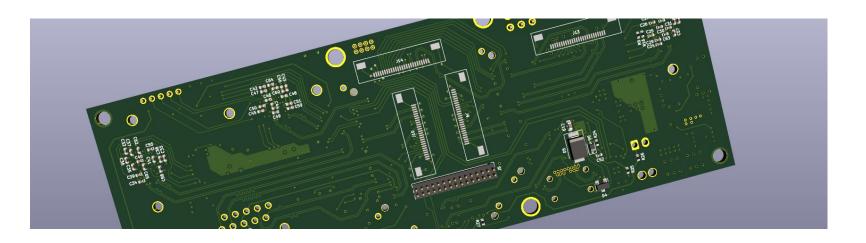

另一些趋势

算法 -> 硬件

芯片固化

event-camera

总结:

总的来说, 在室内机器人定位中, 目前 VIO还无法取代激光, 但是一个很 好的补充。

提示:目前的公司定位部门负责人一般都是......

欲言又止
